To: The Commission

**COMMENTS OF THE REGION 6 – 700 MHz REGIONAL PLANNING  
COMMITTEE**

**FCC REGION 6**

For the purposes of public safety 700 MHz planning, the FCC recognizes 55 individual “Regions”. The Northern California Region (Region 6) comprises the 48 of 58 California counties situated north of the northernmost borders of San Luis Obispo, Kern and San Bernardino counties. Region 6 comprises approximately 40 percent of California’s population of 36+ million.

**REGION 6 COMMENTS**

Region 6 embraces the concepts advanced by Cyren Call Communications Corporation (hereinafter “Cyren Call”) and concurs with the National Public Safety Telecommunications Council (NPSTC) comments filed

November 29<sup>th</sup> 2006 on RM-11348 in which summary NPSTC recommends that the Public Safety Broadband Trust approach outlined by Cyren Call to commit 30 MHz of spectrum in the 700 MHz band (747-762/777-792 MHz) to establish a nationwide public safety communications broadband network be pursued. As NPSTC asserts, unless concepts of this nature are pursued, the severe challenges facing state and local public safety communications will endure.

Respectfully submitted,

November 29, 2006

---

William De Camp, P.E., Chair  
Region 6 – 700 MHz Region Planning Committee
